## PROJECTS

### E - Commerce App

- **React is a great JavaScript framework to build an e-commerce web app.** It has a big & active community, is component-based, supports server-side rendering, uses virtual DOM, just to mention a few. These features make React.js the perfect choice for a fast, scalable, and user-friendly e-commerce website

- GIT REPO :- <https://github.com/RanganaDinesh/E-Com-App>

### BLOG -APP

- React.JS and React Router mainly. While developing this project you will understand that how you can create multiple components in React like Smart Components and Dummy Components and how to modify and do data operations within component using state variables and how to communicate between two components props variables

- GIT REPO LINK :- [https://github.com/RanganaDinesh/Blog-Project\\_PB](https://github.com/RanganaDinesh/Blog-Project_PB)

### Todo App JS

- In this project you will be developing the application in a way that same website can work on multiple devices having different screen sizes in pixels. To achieve this you will be using Media Queries, one of the finest concept in CSS to build responsive applications.
- GIT HOST LINK:- <https://ranganadinesh.github.io/2CSS-PB-Project/>

### Digital Clock

- While developing this project, you will get to work on multiple HTML tags, and various CSS properties. Most importantly you will get introduced with the functions required for DOM manipulation. Also how to add dynamic HTML using JS and Date function of JS.
